## Projects

### DJs app for playing music – audio sampler

[GitHub](#) / [Live Demo](#)

Full stack app that allows a user to play music with custom libraries of samples. JavaScript/CSS/HTML based front end with the use of Handlebars, Bootstrap 4, and SASS. The RESTful back end API is built with Express.js. The app uses MongoDB as a primary database and is integrated with AWS S3 for file storage.

### Bucket List – a list of things to experience in life

[GitHub](#) / [Live Demo](#)

Full stack web application where the front end is created mainly with JavaScript/CSS/HTML, jQuery and Bootstrap and uses AJAX technology to interact with Express back end and MongoDB database.

### Stock Market Trading Simulator

[GitHub](#) / [Live Demo](#)

React application built with custom Ruby on Rails based back end and integrated with a third-party stock market API.

### Tic Tac Toe game for one player

[GitHub](#) / [Live Demo](#)

Front End application with a custom game engine uses such technologies as JavaScript/CSS/HTML, jQuery and AJAX.
